Causes of Death - Our World In Data

The Global Burden of Disease is a major global study on the causes of death and disease published in the medical journal The Lancet. These estimates of the annual number of deaths dataset are shown here. Downloaded <https://ourworldindata.org/causes-of-death> dataset from the first chart as CSV.

In this dataset, data covered that millions of people die because of different types of diseases worldwide.

There are many important questions that helps to understand data in detail:

What caused people's death?

How did the causes of death change over time and differ between different countries and world regions?

Which country has the highest death of people?

Which disease is the most spread over the world?

which country has the highest number of death by causes?

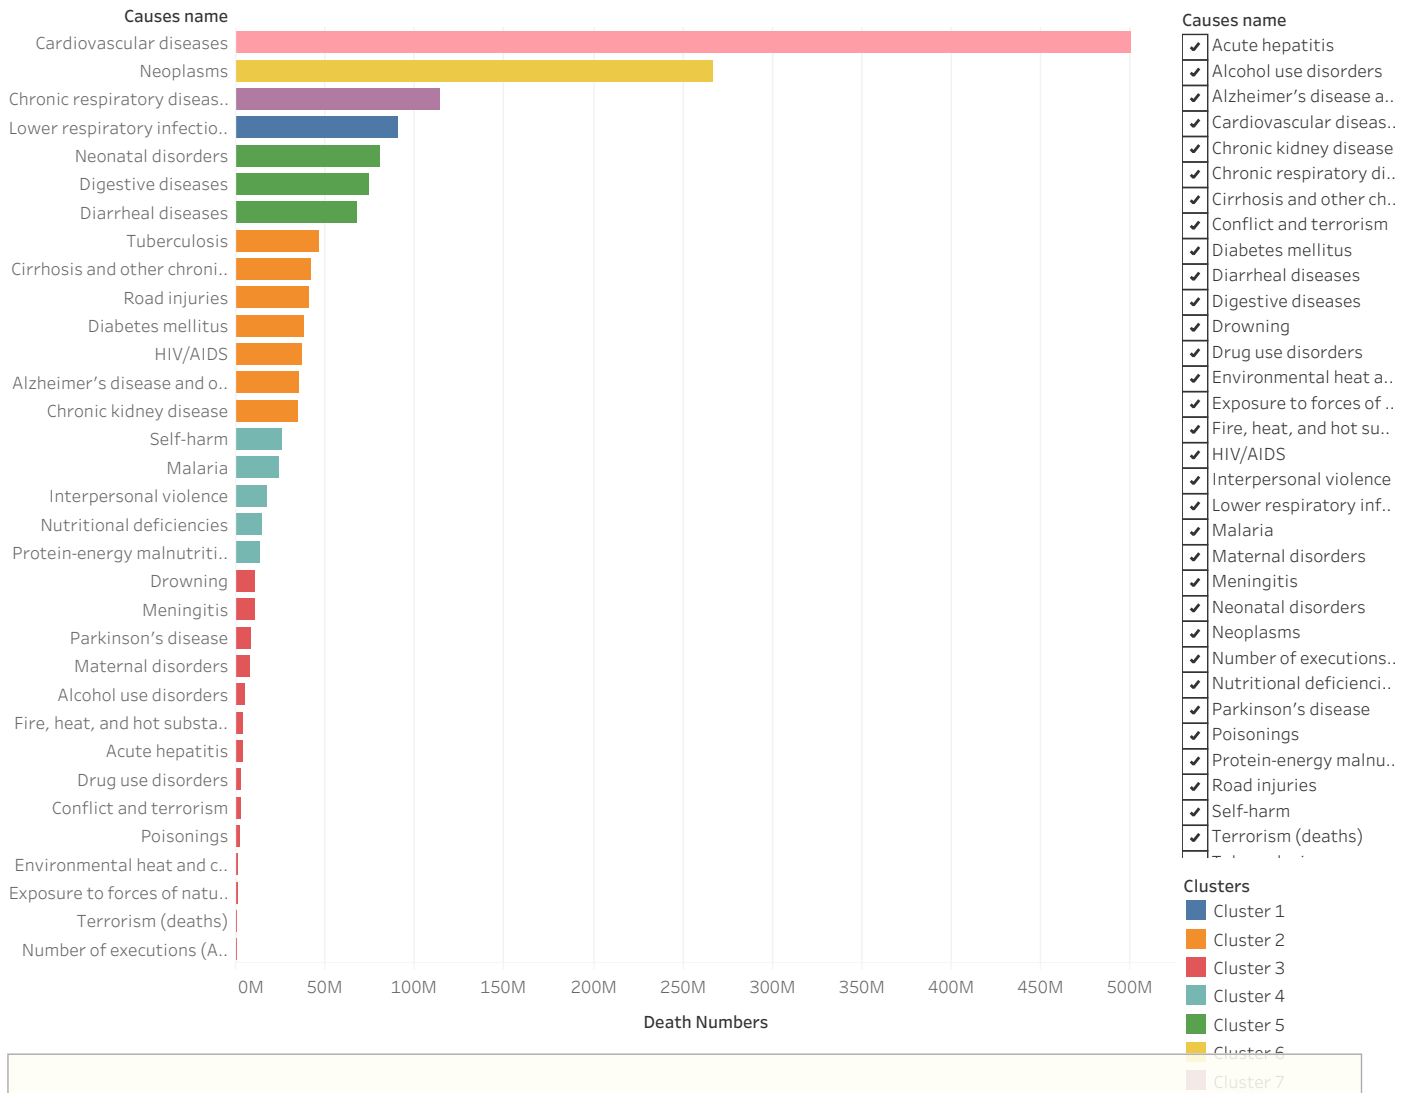

which diseases have the lowest effect on the population?

Comparison of death by addiction in countries sort by income level.

Created forecasting for the highest and the lowest amount of people affected by diseases
